

PTFE hose

Construction

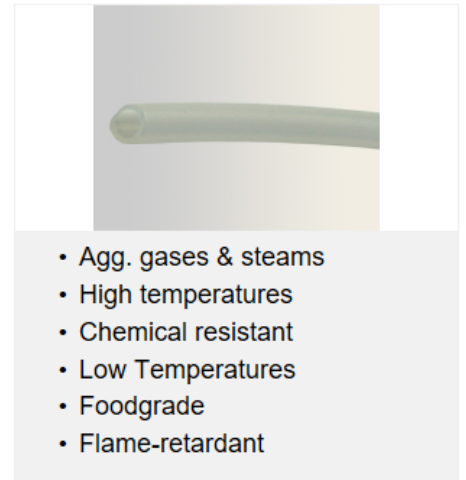

The hose is made of PTFE (polytetrafluorethylene).

Properties

Hose with low friction and with excellent insulating properties. The hose has a smooth surface, so that practically nothing sticks to it. Does not absorb water, is textile-friendly and has no effect on the human body. Resistant to UV light, ozone, oxygen, so does not age.

Field of application

The hose has a broad field of application, eg in the automobile, chemical, food, pharmaceutical, aviation and defence industries.

Temperature Area	-200°C to +260°C
Colour	Naturally transparent. Available in other colours.
Standard Length	ID 1-12 mm: 100 m. Above 12 mm as required.
Dimension Range	1,0-40,0 mm
Other Information	Can also be supplied in: PFA (perfluoralkoxy), FEP (fluoroethylene-propylene) and ETFE (ethylene tetrafluoroethylene)
