Brush strip with central fin

Construction

The brush is of polypropylene (PP) and is anchored in a clamping strip of galvanised steel. Central fin of polyethylene (PE) 0.10 mm.

Properties

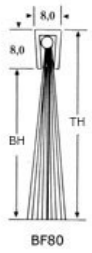

The brush strip has the same properties as the ordinary brush strip but has a higher sealing value. Resistant to ordinary cleaning agents. The fin makes the strip water-repellent and prevents freezing.

Field of application

As a seal for sliding doors, hatches, roller and folding doors, swing and revolving doors. As an edge seal for conveyors, escalators, etc.

Colour	The standard colour is black. Other colours are available.
Standard length	2000 mm. Other lengths are available

Other

BF80
